Bengaluru, Karnataka, India

EDUCATION

VIT BHOPAL UNIVERSITY

Bhopal, Madhya Pradesh

Bachelor of Technology in Computer Science Engineering

With specialization in AI and ML

Sep.2023 – Present

HOLY CROSS SCHOOL

Bengaluru, Karnataka

Secondary Education

Class X:- 95%

Class XII:- 85%

Jun. 2021 – Mar. 2023

PROFESSIONAL SUMMARY

- ❖ Computer Science undergraduate at VIT Bhopal University, specializing in Artificial Intelligence & Machine Learning.
- ❖ Proficient in Python, C++, and Java with strong foundations in Data Structures, Algorithms, and Machine Learning.
- ❖ Created AI/ML projects including Fake Product Detection (Computer Vision + NLP), Movie Recommendation System (SVD), and Spam Mail Classifier (NLP).
- ❖ Solved 101+ algorithmic problems on LeetCode (77% acceptance rate) across Dynamic Programming, Hash Tables, Arrays, and Strings with a 52-day coding streak.
- ❖ Active competitive programmer on Codeforces (rating 646), participating in algorithmic contests and strengthening skills in algorithm design and data structures.

PROJECTS

Fake Product Detection using AI & ML | Python, HTML, CSS

Sept 2024 – Nov 2024

- ❖ Built an AI-based counterfeit product detection system for e-commerce platforms using CNN and NLP models.
- ❖ Implemented computer vision models with OpenCV and TensorFlow to analyze 5,000+ product images.
- ❖ Processed 8,000+ product descriptions and image records using TF-IDF and word embeddings.
- ❖ Applied data augmentation and feature engineering to improve classification accuracy by ~18%.
- ❖ Designed an anomaly detection pipeline for price irregularities and seller behavior analysis.
- ❖ Achieved ~87% classification accuracy in identifying counterfeit or suspicious product listings.

Movie Recommendation System using SVD | Python, Scikit-learn, Pandas

Feb 2025 – Mar 2025

- ❖ Built a personalized movie recommendation system using Singular Value Decomposition (SVD).
- ❖ Trained the model on the MovieLens dataset containing 100K+ ratings and 9,000+ movies.
- ❖ Implemented collaborative filtering techniques to generate recommendations for 1,000+ simulated users.
- ❖ Performed data cleaning and preprocessing on 100,000+ rating records using Pandas.
- ❖ Applied matrix factorization and dimensionality reduction to improve model efficiency by ~25%.
- ❖ Evaluated model performance using RMSE (0.86) and optimized parameters to improve prediction accuracy by ~15%.

TECHNICAL SKILLS

Programming Languages: C++, Java, Python, SQL

Web Development: HTML, CSS, JavaScript

Machine Learning & AI: Machine Learning, Deep Learning, Computer Vision, Natural Language Processing

Libraries & Frameworks: TensorFlow, PyTorch, Scikit-learn, NumPy, Pandas, Matplotlib, Seaborn, OpenCV

Developer Tools: Git, GitHub, VS Code, CodeBlocks, Jupyter Notebook
