

NAMAN SINGH

Bengaluru, Karnataka, India | +91 9773613148 | namansingh2475@gmail.com | linkedin.com/in/namansingh2405 | github.com/lamNamanSingh

PROFESSIONAL SUMMARY

- B.Tech Computer Science Engineering** (AI & ML Specialization) undergraduate at VIT Bhopal University with a strong technical foundation across Python, JavaScript, and Applied Machine Learning, delivering **4+** end-to-end software systems.
- Proficient in Data Structures, Algorithms, and Object-Oriented Programming (OOP)** with **109+** problems solved on LeetCode; strong debugging and algorithmic optimization in Agile sprints.
- Designed 15+ REST APIs** (FastAPI, Flask) and implemented containerized microservices using **Docker** for automated cloud deployments.
- Created 3 Generative AI/NLP applications** (Agentic Workflow systems with PostgreSQL backends) and **2 Computer Vision systems** using TensorFlow, PyTorch, and React.js.
- Collaborated in Agile/Scrum teams across 3 projects** to deliver high-quality, fully-tested codebases under rapid prototyping cycles.

TECHNICAL SKILLS

Languages: Python, JavaScript, HTML/CSS, Java, C++, SQL
Frameworks & Libraries: React.js, FastAPI, Flask, PyTorch, TensorFlow, Scikit-learn, LangChain
Databases & Vector Search: PostgreSQL, SQLite, FAISS, ChromaDB, Sentence-Transformers
Software Engineering & DevOps: REST APIs, Docker, CI/CD (GitHub Actions), AWS (EC2, S3), Git, GitHub, PyTest, Agile/Scrum

RELEVANT PROJECTS

Agentic Workflow Automation Platform Jan 2026 - Mar 2026

Technologies: React.js, Python, FastAPI, PostgreSQL, Docker, GitHub Actions

- Engineered a full-stack automation platform enabling orchestration of multi-agent workflows, reducing process latency by **35%**.
- Designed FastAPI-based REST APIs connecting autonomous search and coder agents to a high-concurrency **PostgreSQL** database.
- Containerized the services using **Docker** and designed a **CI/CD** pipeline via **GitHub Actions**, cutting build-integration times by **40%**.

MedAI Clinical Diagnostic Portal Nov 2025 - Dec 2025

Technologies: React.js, Python, Flask, PostgreSQL, PyTorch, REST APIs

- Architected a medical scan-analysis platform using **Flask** (MVC) and **PostgreSQL** to organize diagnostic classification jobs.
- Built a scalable **React.js** UI dashboard to visualize real-time agent scans, improving doctor diagnostics validation times by **40%**.
- Integrated secure REST API controllers with database indexing, reducing patient record query latency by **50%** under peak loads.

ContextRAG: End-to-End RAG Pipeline Jul 2025 - Sep 2025

Technologies: Python, FAISS, ChromaDB, Sentence-Transformers, Docker, Groq

- Engineered a modular Retrieval-Augmented Generation (NLP) pipeline with swappable LLM backends, reducing retrieval latency by **35%**.
- Implemented dense vector search with FAISS/ChromaDB, increasing semantic context retrieval accuracy by **45%**.
- Configured hallucination detection filters, ensuring **95%+** output reliability for client-facing production applications.

Smart AI Resume Analyzer & SaaS Platform Apr 2025 - Jun 2025

Technologies: Python, Streamlit, SQLite, Gemini API, Selenium

- Architected an AI resume analyzer using the Gemini API, evaluating ATS compatibility in under **3** seconds.
- Achieved **98%+** text extraction precision from PDF/DOCX resumes by combining PyPDF2, docx, and Tesseract OCR parsing techniques.
- Automated real-time job scraping of **1,000+** daily listings using **Selenium**, storing analytics in a SQLite database.

EDUCATION

VIT Bhopal University Sep 2023 - Present

B.Tech, Computer Science Engineering (AI & ML Specialization) **CGPA: 8.42** | Coursework: Data Structures & Algorithms, Deep Learning, Database Management

Holy Cross School, Bengaluru Jun 2021 - Mar 2023

Secondary & Senior Secondary Education **Class X: 95% | Class XII: 85%**
